<i>Webfeat</i>													Todd Miller			

**NOTES:**

Italicized companies were not asked to provide a speaker for this year's President's Seminar. Companies shown in bold face were asked to provide a representative. Italicized speaker names indicate a declined invitation to participate.

From 1991 through 1999 invitees were chosen based on market share as represented in Library Journal's annual April "Automated System Marketplace" articles.

Panelists at the 2000 through 2005 seminars were invited based on suggestions received in response to Rob McGee's informal survey of past participants.

Beginning in 2005 select individuals have been invited as special guest commentators; 2005's commentators include: Bob Walton, Vice President for Business and Finance, The College of Wooster, and member of the Board of Directors, Dynix, Yves Salembier, Vice President of Technology, ISACSOFT, and Carl Grant, Chair of VIEWS, and President & COO, VTLS.
